

..My paintings are a constant reminder of our loveable weaknesses, them being exemplary for the fragility of our species.

I love the wildness of improvisation, the throwing up of the soul, and the process that brings about this freedom.

I love the childlike silliness and getting lost within the oblivion of reason.

But I also love the rewards for the small steps that discipline has to offer."

INVITATION TO THE VERNISSAGE

BRAND

## **Holger Brandt**
